

16 September 2024

Twist Bioscience attests that the company adheres to all requirements in the U.S. Office of Science and Technology Policy (OSTP) [Framework for Nucleic Acid Synthesis Screening](#). Twist implements the following critical biosecurity and information security practices, as specified in the Framework:

- Screens purchase orders of synthetic nucleic acids to identify sequences of concern (SOCs)
- Screens customers submitting purchase orders of synthetic nucleic acids with SOC to verify legitimacy
- Reports potentially illegitimate purchase orders of synthetic nucleic acids involving SOC to relevant authorities
- Retains records relating to purchase orders of synthetic nucleic acids
- [Takes steps](#) to ensure cybersecurity and information security including ISO 27001 certification.

Signed,

Emily M. Leproust, Ph.D.
CEO and Cofounder
Twist Bioscience
